## DETAILED ACTION

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

1. Claims 1, 3-11 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-3 & 11-13 of U.S. Patent No. 7,087,107. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the present application are disclosed by the US Patent claims and would be obvious thereby.

In the above references, it is the examiner's position that it would have been obvious to one having ordinary skill in the art that: (1) the absorbance ratio  $b/a$  of the maximum absorbance  $b$  in the absorption band of 660 to 680 nm and the maximum

Art Unit: 2853

absorbance  $a$  in the absorption band of 600 to 640 nm is less than 0.8, since the phthalocyanine compound of the above references are the same structure as those claimed by applicant.

### ***Response to Arguments***

2. Applicant's arguments with respect to claims 1 & 3-11 have been considered but are moot in view of the new ground(s) of rejection.
